

For Foundations & Organizations Interested in Partnership

RESEARCH PARTNER PROGRAM

TEAMING TOGETHER TO PROVIDE HOPE

We believe a collaborative approach is the only way a cure will be found. We welcome the help of other organizations interested in helping fund game-changing DIPG/DMG research.

Every year, ChadTough Defeat DIPG receives more high-quality research proposals than we can fund. In our most recent grant cycle, researchers from leading institutions around the world submitted nearly 100 applications seeking support for innovative approaches to treating and curing DIPG/DMG.

Through a rigorous scientific review process led by our Scientific Advisory Council, which is composed of internationally recognized leaders in pediatric neuro-oncology and brain tumor research, we identify the projects with the greatest potential to accelerate progress for children facing this devastating disease.

The challenge is not finding promising science. The challenge is having sufficient resources to fund it.

By becoming a Research Partner, your organization gains access to one of the most comprehensive and competitive DIPG/DMG research funding programs in the world. Together, we can ensure that more of the most promising ideas receive the support they need to move forward, bringing us closer to better treatments and ultimately a cure.

PARTNER OPPORTUNITIES

RESEARCH CO-FUNDER

Donation: \$25,000+

- + Recognized generally as a Research Partner as well as on a specific project on ChadTough.org and in press release
- + Investigator of chosen project notified of partnership with foundation
- + Access to annual project updates
- + For each additional \$25K contribution, co-funder has option to be recognized on an additional project
- + Includes all benefits of Research Collaborator

RESEARCH COLLABORATOR

Donation: \$5,000+

- + Recognized generally as a Research Partner
- + Logo featured on Research Partner page on ChadTough.org
- + Invitation to bi-annual update meeting
- + Invitation to annual Research Workshop and Gala
